IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Michael D. Bowman et al.

Serial No.: 10/604,189

Filed: 6/30/2003

For: AIRCRAFT SECONDARY ELECTRIC LOAD CONTROLLING
SYSTEM

Art Unit: 2836

Examiner: Dru M. Parries

To: Mail Stop AF
Commissioner for Patents
P. O. Box 1450
Alexandria, Virginia 22313-1450**Supplemental Response After Final Rejection**

The following response is being submitted to the final rejection dated February 3, 2006, as a supplement to the response filed on April 14, 2006. This instant substitute response is prompted by a subsequent telephone conversation between the Examiner and the undersigned.

In particular, the applicants thank the Examiner for pointing out the error in the applicants' argument originally presented in the section titled "Re: the requirement that the combined references teach all the limitations of the present invention." This instant section has been revised in the substitute response.

Further, a section titled Re: Paragraph [0021] of the specification is added to address the Examiner's concern with the teaching of paragraph [0021] of the specification.
